- **Dr. Róbert Kovács**, associate professor at Károli Gáspár University of the Reformed Church in Hungary, Faculty of Law, Budapest
Situational crime prevention and the perspective of municipalities

09.30 – 10.00 INPUT PRESENTATIONS FOR THE A WORKSHOPS

- **Gregory Saville**
Practical applications of the SafeGrowth Planning System - A short workshop on tactics
- **Dr. István Jenő Molnár**
Security: compulsory or recommended?
- **Anna Szilágyi-Nagy**
Matter of opinion – Whose task is crime prevention through environmental design?

10.00 – 10.20 COFFEE BREAK

10.20 – 12.30 WORKSHOPS

a) Practical applications of the SafeGrowth Planning System - A short workshop on tactics (Gregory Saville)

In this short workshop, Gregory Saville will describe the strategies employed within a SafeGrowth Planning system. Participants will learn organizational tactics such as: Establishing Livability Academies for neighbors; Applying the Risk Assessment Matrix to diagnose local problems; and Using the Digitized Community Safety Audit to map assets and fears. There will also be a short group desktop exercise on Deploying 1st and 2nd Generation CPTED using SafeGrowth Plans.

b) Security: compulsory or recommended? (Dr. István Jenő Molnár)

Crime prevention through environmental design is a new tool for ensuring our security. Besides making the experts, shareholders and citizens acquainted with this new method, the big question is that how can we ensure the application of its principles? Shall it be compulsory, optional or mandatory optional, similarly how it is done at the universities? What tools are required to ensure that the local governments, building engineers, builders or the customer take into consideration the recommendations of crime prevention through environmental design? The major question of the workshop is the following: Security: compulsory or recommended?!

c) Matter of opinion – Whose task is crime prevention through environmental design? (Anna Szilágyi-Nagy)

During the workshop we assess from the point of view of various town stakeholders/participants how can the town/city leaders, police force, local institutions, resident young people and adults, civil initiatives, enterprises or media experts contribute to the establishment or alteration of the town's/city's built environment or possibly to its maintenance.

12.30 – 13.00 CLOSING
